

Category B sites are sites of regional importance. These sites are not of sufficient importance to justify scheduling, but are nevertheless important in aiding the understanding and interpretation of the archaeology of the region. Preservation in situ is always the preferred option for these sites, but if loss or damage is wholly unavoidable, detailed recording appropriate to the importance of the site must be undertaken.

Category C sites are sites of local importance. These sites are of lesser importance, but are nevertheless useful in the understanding and interpretation of the archaeology of the local area. They may not be of sufficient importance to justify preservation if a development threat is unavoidable, but merit adequate recording in advance of loss or damage, or if portable they should be moved.

Category D sites are either sites or features of minor importance or those which are so badly damaged that too little now remains to justify

Legend

Archaeology Points

STATUS

- ▲ B
- ▲ C
- ▲ D

- Proposed trenches 20m x 2m
- Possible Borrow Pit Areas
- Turbine Location
- Site Tracks
- Construction Compound
- Substation Location
- * Meteorological Mast Location
- Archaeology Survey Area
